<u>Reference</u>			
Palo Santos Presentation TM	Moving coil, 0.5 mV output via an Alnico magnet assembly, long-grain boron cantilever with a new line contact stylus, a redesigned, far more rigid, machined aluminum cradle houses the complete generator mechanism, milled teflon billet back plate, custom hollow point and tapered brass gold plated connecting pins for ease of installation.	3.563	3.750
Pearwood Celebration TM	Moving coil, 0.5 mV output via an Alnico magnet assembly, long-grain boron cantilever, a new ultra low-mass Ogura Jewel Co. P9 Stylus (Vital Design), a machined billet Teflon back plate features custom hollow. A machined aluminum inertia cradle houses the complete generator mechanism.	2.375	2.500
Blackbird TM	Moving coil, high-output, 2.5 mV, long boron cantilever with synthetic elastomer suspension, low-mass custom ground stylus for low tip mass and low record wear. Open generator design, with resonance controlled mounting system provides the lowest mechanical impedance. Highly compatible with most modern tonearms.	1.093	1.150
Blue Point Special EVO III TM	High-output moving coil design with 2,5 mV output. Chemically coated aluminum cantilever with 0.3mm x 0.7 mm elliptical stylus. Ultra low-resonance open generator. Resonance controlled mounting system provides low mechanical impedance. Highly compatible with most modern tonearms.	466	490

Oyster

Blue Point No.2 TM	Moving coil, high output 2.5mV	380	400
Pearl TM	Moving magnet, alloy cantilever and 5.0 mV output	124	130
Black Pearl TM	Moving magnet, alloy cantilever and 5.0 mV output	105	110
Oyster TM	Moving magnet, alloy cantilever and 4.0 mV output	71	75
